This architectural plan showcases incredible views of the ocean, coastline, and rolling hills. The 6,000-square-foot home was designed by Mary Ann Schicketanz of Carver + Schicketanz Architects, and was completed in 2002. The interior designer, Jorie Clark, was the recipient of the ASID top two "Judges Choice" awards for residential design in 2007.

Although the current emphasis of her work has been on large-scale modern residential projects, she has also designed interiors in the Spanish vernacular and Arts-and-Crafts style in the lovely Santa Lucia Preserve. She has also worked on commercial projects, including the Cypress Inn, Doris Day's famed historic Hotel in Carmel, and retail and restaurant projects. Her work has been featured in *Architectural Digest*, *Interior Design Magazine*, and numerous other publications.
